Capital Growth Buchalter (“CGB”) has a reputation for focusing on people, not buildings. Our aim is to serve others through real estate, offering technical expertise and capital to fulfill their goals. Having a vertically integrated development company allows us to manage costs and to provide counsel on all real estate-related business items.

Professional. Insightful. Dependable.

These are the reasons why owners, brokers, and other professionals turn to Capital Growth Buchalter as their partner. Our professionalism and insight can be counted on, time and time again, to help our partners achieve their goals and deliver results.

Local market expertise. National data. Robust capabilities. Future-focus.

We pursue all of our projects and relationships with tenacity, expertise and experience. We position our clients and partners to receive projects consistently on time and on budget.

THE CGB ADVANTAGE

Capital Growth Buchalter (“CGB”) is a construction, development, investment and management firm with more than 68 years of experience as a company entity. Over those nearly 70 years, CGB has developed more than 1,200 projects and \$1.8 billion of real estate—and at any given time, the company has active projects across multiple states and sectors.

Our strength is two-fold: our programmatic development platform for high-volume development end-users and our uncanny ability to evaluate opportunistic land, building and assemblage acquisitions. On average we deliver one completed project per week, and in the past decade, we have successfully completed more than 700 development projects.
